

## Gulf County Bid 1415-24/Communications Tower Repairs/Addendum #1

The following questions have been asked and appropriate answers are hereby noticed.

1. What is the complete address of the Wewahitchka Tower? 222 2<sup>nd</sup> Street, Wewahitchka, FL 32465
2. Will the county be supplying the Andrew DB 420 Antennas and coaxial cable? No, all supplies, materials and labor are included in the bid.
3. Please clarify 1.1 Letters of Response: We are requesting that anyone that may know of a different type of equipment that will do the same, or better, job to complete the bid, simply so state and give pricing. (I.E., combining two or more antennas into one for two separate repeaters, thus saving space, wind load etc.)
4. In point 1.1 Letter of Response, B) 3) Move Antenna, what type of antenna is to be moved? DB 420, side mounted currently.
5. In reference to question 4 above, where is the antenna today, and where is it moving to? We want to mount the antennas where we can get the best signal strength and best reception. We were looking at the install of the standoff at its current location. However, if there is a better option, we will entertain options on that as well.
6. Is there mandatory pre-bid meeting? No, it will be the responsibility of the bidders to locate, investigate and obtain any other information necessary to place a competitive and objective bid.
7. Are there any tower drawings? We are looking to see if there are tower drawings available and will have those posted as an addendum, if they are discovered before the bid deadline.
