To whom it may concern:

It has been brought to our attention that a drainage ditch easement exists on land owned and maintained by the Florida Fish and Wildlife Conservation Commission – Gulf County, Official records book 75, page 215. The purpose of this easement was to construct and maintain a drainage ditch that to our knowledge was never installed. Since a ditch does not exist in this easement we would request this easement be set aside or quit claim to the owners of the properties impacted by the easement.

Thank you for your consideration.

A 10.00 foot wide Easement Area defined as lying 5.00 feet on each side of GRANTEE's facilities to be installed at mutually agreeable locations over, across and through the following described property to accommodate present and future development:

SECTION 23, TOWNSHIP 9 SOUTH, RANGE 11 WEST, GULF COUNTY FLORIDA, AC S/2 OF LOT 2 ORIG. 1320 FT GULF FRONT; 1300 FT DEPTH, MORE OR LESS, AS RECORDED IN OFFICIAL RECORDS BOOK 97, AT PAGE 580, LAND PATENT FROM USA (BEING SOUTH GULF COUNTY FIRE DEPT. AND SALINAS PARK MAP # 54C).

The rights herein granted to GRANTEE by GRANTOR specifically include: (a) the right for GRANTEE to patrol, inspect, alter, improve, repair, rebuild, relocate, and remove said facilities; further GRANTEE hereby agrees to restore the Easement Area to as near as practicable the condition which existed prior to such construction, repairs, alteration, replacement, relocation or removal as a result of GRANTEE's safe and efficient installation, operation or maintenance of said facilities; (b) the reasonable right for GRANTEE to increase or decrease the voltage and to change the quantity and type of facilities; (c) the reasonable right for GRANTEE to clear the Easement Area of trees, limbs, undergrowth and other physical objects which, in the opinion of GRANTEE, endanger or interfere with the safe and efficient installation, operation or maintenance of said facilities; (d) the reasonable right for GRANTEE to trim or remove any timber adjacent to, but outside the Easement Area which, in the reasonable opinion of GRANTEE, endangers or interferes with the safe and efficient installation, operation or maintenance of said facilities; (e) the reasonable right for GRANTEE to enter upon land of the GRANTOR adjacent to said Easement Area for the purpose of exercising the rights herein granted; and (f) all other rights and privileges reasonably necessary or convenient for GRANTEE's safe and efficient installation, operation and maintenance of said facilities and for the enjoyment and use of said easement for the purposes described above. The rights and easement herein granted are non-exclusive as to entities not engaged in the provision of electric energy and service and GRANTOR reserves the right to grant rights to others affecting said easement area provided that such rights do not create an unsafe condition or unreasonably conflict with the rights granted to GRANTEE herein.

GRANTOR hereby covenants and agrees that no buildings, structures or obstacles (except fences) shall be located, constructed, excavated or created within the Easement Area. If the fences are installed, they shall be placed so as to allow ready access to GRANTEE's facilities and provide a working space of not less than ten (10) feet on the opening side, six (6) feet on the back for working space and three (3) feet on all other sides of any pad mounted transformer. If GRANTOR's future orderly development of the premises is in physical conflict with GRANTEE's facilities, GRANTEE shall, within 60 days after receipt of written request from GRANTOR, relocate said facilities to another mutually agreed upon Easement Area in GRANTOR's premises, provided that prior to the relocation of said facilities (a) GRANTOR shall pay to GRANTEE the full expected cost of the relocation as estimated by GRANTEE, and (b) GRANTOR shall execute and deliver to GRANTEE, at no cost, an acceptable and recordable easement to cover the relocated facilities. Upon the completion of the relocation, the easement herein shall be considered cancelled as to the portion vacated by such relocation. This legal description was provided by GRANTOR. Hosted By: American Aluminum Accessories

Workshop Overview:

Police service dogs are utilized to search for, locate and subdue criminals. The dog's ability adds a dramatic level of safety to the officers and ultimately the public they serve. To effectively provide this level of safety the dog must be conditioned to engage in active combat with a suspect in a variety of circumstances and provide sufficient pain compliance to stop the suspect's threatening behavior. The ultimate success of a police service dog team in providing effective pain compliance, and the resulting safety of officers, is attributed directly to the knowledge and skills of the agitators utilized to train and maintain the dog. The purpose of this course will be to provide you with this knowledge and skill.
